Latest Events

French Tech Tour Japan

Login People was selected by UBIFRANCE Japan. We had the opportunity to meet and present the Digital DNA Technology® to key Japanese companies: SONY, Fujitsu, NEC, Hitachi Solutions, DeNA (leader in social networking and gaming), Rakuten Bank, Softbank and Atlas Computer. We are in discussions with several of them.

GITEX - Dubai, UAE, 9-13 October 2011

We demonstrated our technology and products on the French Pavillion of UBIFRANCE at GITEX, the biggest IT conference in the Middle East. It created new opportunities with IT security integrators, resellers and distributors in the Middle East region: UAE, Kuwait, Iran, Lebanon, Pakistan, Sultanate of Oman, and also Turkey, India and Sri Lanka. We signed already our first distribution agreement with AGGEIOS in Kuwait.

CLOUD & IT EXPO UAE, 9-13 October 2011

Conference and expo recognized for cloud computing, virtualization and IT security. As a member of the French IT security cluster "SCS Pole", we had the opportunity to showcase the Digital DNA Technology® to

Products and Technology: More to Come in 2012

► Digital DNA Server 5, released in September 2011

Usability, configurability and maintainability were the key drivers of our latest server release, which was very well received by our customers, integrators and distributors. A new Software Development Kit (SDK) is available as well.

[Read more >>](#)

► Integration with Microsoft ADFS 2.0 (Active Directory Federation Services)

Digital DNA Server is now integrated with Microsoft leading federation solution, using Login People STS (Secure Token Service). Through ADFS support for the WS-Federation and SAML 2.0 protocols, our server can be easily integrated and provide both strong authentication and interoperable federated Web SSO.

► DNA Winlogon

We will be releasing soon a Winlogon extension that will help enterprises strengthen network domain security by enforcing usage of Digital DNA in addition to user/password when connecting to an enterprise domain or a disconnected enterprise computer.

► Upcoming iOS release: iPhone and iPad support

Today our technology supports the Digital DNA of iPhones connected via a USB cable. In Q1 2012 we will be releasing an iOS version of our technology: users will be able to browse Digital DNA-enabled web sites, or use iOS applications protected by Digital DNA authentication.

Support for other smartphones' OS will follow.

► Demonstrations

New demonstrations are available on our web site, in addition to the protection of our shareholders zone. The three types of demonstrations show different usage scenarios of the Digital DNA Technology®: webmail protection, CRM access, or online store security.

► You are evaluating Strong Authentication solutions and want to Test our Technology?

Please [contact us](#) and we will organize a 30-day trial period on one of our SaaS servers.

Services

► Login People Certification Program

Login People proposes a 2-day intensive Certification Program in Sophia Antipolis, France (headquarters). The first day is oriented toward installing and configuring the server, as well as understanding different integration scenarios (VPN-SSL, web site authentication, webmail access, etc.). The second day focuses on the integration itself with our SDK. Please [contact](#) our team to receive conditions and schedule.

Channel Network

many IT security specialists. It created space to develop our network of channel partners. We are glad to welcome Kernel Networks, leading specialist in Identity and Strong Authentication in France and Switzerland.

► **France: National Distribution Agreement with CRIS Réseaux & Sécurité**

With agencies in Marseille, Toulouse, Nantes and Lyon, CRIS Réseaux & Sécurité is one of the main French Value Added Distributor (VAD) in France. They decided to add the Digital DNA Server to their product catalogue and will address shortly their 850 clients (integrators and resellers) in France. The Digital DNA Technology® will be presented in the catalogue as their main offer for strong authentication.
